

Parent Compact for Achievement

2021- 2022

Mission Statement

Inspire and Empower Students for Success

Sewell Elementary

Sewell administrators and teachers have studied our student performance data to decide on the most important areas of improvement for our school. Sewell will improve in all areas with a special focus on grades K-5 mathematics.

Sewell Students

Sewell students will use strategies learned at school to extend their mathematical reasoning and learning at home by:

- Talking with my family about what I am learning in math.
- Using pictures, symbols, diagrams, words and numbers to explain and prove my thinking.
- Using more than one strategy to find an answer to a math problem.

Sewell Classrooms

Our educational teams will provide high quality curriculum and instruction in all core academic areas in a supportive environment that enables students to meet the standards.

Key connections with families will be:

- Provide parents with an overview of the mathematics curriculum Eureka Math at their grade level.
- Teach students and parents how to:
 - *Solve problems together
 - *Explore different ways to solve the same problems
 - *Ask your child questions as they solve problems
- Communicate via class newsletters, school website, direct email, open classrooms, and accessible staff to ensure ongoing communication regarding student progress.

At Home

Sewell parents will use strategies to extend students' mathematical reasoning at home by:

- Having fun with math. Playing games that make learning fun and important.
- Discussing how our family uses mathematics in our daily life.
- Solving problems together and exploring different ways to solve the same problem
- Asking your child questions as they solve problems.
